

Service Technician (f/m) based in the region of Brno
Reference code 00009353

Vestas[®]

Wind. It means the world to us.[™]

Experience the forces of wind

Join Vestas and work with cutting-edge wind technology

As one of the world leaders in wind power and with wind turbine installations in over 65 countries and more than 20.000 employees globally, Vestas looks to accelerate innovation through the development of our employee's skills and talents. Our goal is to reduce CO2 emissions dramatically and ensure a sustainable world for future generations.

Department

Vestas Central Europe, as one of the well-established business units, is responsible for all sales and service related activities in Germany, Switzerland, Benelux, Austria, most countries in Central and Eastern Europe and South-East Africa. For our Service department in Czech republic we are looking for a Service Technician for the region of Brno.

Responsibilities and Tasks

- Electrical and mechanical operations, as well as working with high voltage
- Erection of wind turbines, commissioning, maintenance and upgrading installation activities
- Carrying out a diversity of repairs and replacement activities of turbine components
- Responsible for a frictionless operation of our turbines and use of our systems like Condition Monitoring / Remote Control
- Creating follow-up orders

Qualifications and Work Experience

- Completed technical training in the electrotechnical area or electromechanical, preferably qualified in working with high voltage
- Several years of professional experience
- Good knowledge of English and Czech is mandatory
- Basic knowledge of MS Office
- Driver's licence, class C1E (former class 3)
- Willingness to travel
- Comfortable with working at heights, safety awareness
- Open and friendly attitude towards teammates and others

What we offer

We offer a challenging job, an excellent learning environment and opportunities for career development at the world's leading wind turbine manufacturer. You will become part of a highly professional environment in a growing industry.
